imc marks. the only marker with OTM™ technology!

With our exclusive “**On The Mark**” technology, IMC Marks™ markers are engineered, produced, and tested at a standard that is second to none!

IMC Marks is committed to producing and providing superior professional marking products. Our markers are specifically formulated and produced from the highest quality paints, pigments and materials engineered to make bright, clear marks. Be confident in making your mark on any surface, under any conditions, any temperature, any time!

At IMC Marks we believe that value begins by using the proper tool, therefore our idea of technical support is hands-on application analysis. We not only match the appropriate marker, crayon, or chalk to meet your needs, but we do it with higher quality, better value, and innovative design - that is **OTM technology**, found only at IMC Marks.

Our goal is simple, to provide superior marking products for your applications.

imc marks™ - markers, crayons and chalk

It's common to use the term marker, crayon or chalk interchangeably, but there is a big difference.

MARKERS: Use either paint or ink.

Paint: is a solution composed of suspended pigments which must be mixed prior to use to make a permanent durable coating that is UV resistant and available in a wide range of colors, light to dark.

Ink: Is a solution composed of dissolved dyes that are permanent and dry instantly but are not available in light colors (like white) and are not UV resistant.

CRAYONS: Use either wax or clay as a base.

Either wax or clay bases are mixed with ground pigments which are somewhat UV resistant available in a wide range of colors, light to dark. Temperature sensitive.

CHALK: Chalk mixed with dye.

Chalk is a very economical marking solution for temporary marks. Marks wipe off and are not available in dark colors (like black) and are not UV resistant.

what it means to be green at imc marks... ...marking solutions with eco-conscious!

IMC Marks meets the demands of today's application challenges and increasingly stringent global regulations with continuous product evolution. Our strength lies in bridging the gap between performance and strong solutions with environmental compliance.

prime-action™ paintmarker

Xylene-Free industrial paint formula is:

- Lead-Free • Non-Toxic • Permanent
- UV resistant

PRODUCT FEATURES

- **ASTM D4236** Compliant
- Dimensions: ø14mm x 142mm (ø 9/16" x 5-9/16")
- Aluminum barrel holds 10ml paint
- Temp range: -45°C to 65°C (-50°F - 150°F)
- Dry time: approx. 20 sec.
- Reversible tip (replacements available)
- 2mm bullet, 4mm chisel

2mm bullet tip
4mm chisel tip

Qty: 12 / box - 144 / case

HDO prime-action™ paintmarker

Heavy Duty Oil based industrial paint formula for:

- Exceptional adhesion and durability • Permanent
- UV resistant

PRODUCT FEATURES

- **ASTM D4236** Compliant
- Dimensions: ø14mm x 142mm (ø 9/16" x 5-9/16")
- Aluminum barrel holds 10ml paint
- Temp range: -45°C to 65°C (-50°F - 150°F)
- Dry time: approx. 20 sec.
- 2mm heavy duty bullet tip (replacements available)

2mm bullet tip

Qty: 12 / box - 144 / case

low corrosion paintmarker

- Non-Corrosive industrial paint formula designed for stainless steel marking.

PRODUCT FEATURES

- Industrial formula that is:
- Non-Corrosive • Lead-Free • Non-Toxic • Permanent
 - Writes on all non-porous surfaces • Rugged tip
 - Fast-Drying • UV resistant • Bright marking

2mm bullet tip

Qty: 12 / box - 48 / case

pre-certified nuclear grade paintmarker

- Pre-Certified Nuclear Grade industrial paint formula designed to meet government standards:
- RDT F-7-3T • MIL2041D • C3070

2mm bullet tip

PRODUCT FEATURES

- Industrial formula that is:
- Non-Corrosive • Lead-Free • Meets DOE standards
 - Non-Toxic • Permanent • Writes on all non-porous surfaces
 - Rugged tip • Fast-Drying • UV resistant • Bright marking

Qty: 12 / box - 48 / case

the power of industrial paint in a crayon

solid stick paintmarkers 

When your name is on the line the marker better make the line!

Formulas for your application specific needs where our No.1 and No 1X solid sticks are all-purpose.

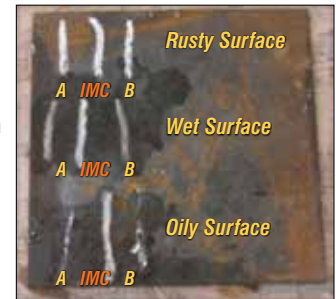

applications

- Any surface: Wet, Dry, Dirty, Oily, Cold or Hot
- Fabrication • Steel Structure Erection
- Rubber - Conveyor Belts and Tires
- Packaging...even writes on wet cardboard!
- Pipe and Tube • Salvage Yard
- Welding / Brazing • Inventory Control
- Concrete / Asphalt Repair • Timber
- Ship Building

PRODUCT FEATURES

- Dimensions: ø19mm x 117mm (ø 3/4" x 4 5/8")
- Adheres to **any** surface
- Writes under water
- Writes thru oil
- Dries instantly, cures permanent within minutes
- Glides on **smooth**
- Lead-Free
- Non-Toxic
- UV resistant

Qty: 12 / box - 144 / case

Made In USA

hot “chalk” high temperature paint stick

hot surface chalk

applications

- Forge and Casting Foundries
- Warehouses
- Stamping Works and Machine Shops
- Steel Mills
- Aluminum Mills

PRODUCT FEATURES

- Size: ø11mm x 117mm length (ø7/17” x 4-5/8”)
- Real paint in stick form that marks on hot surfaces like red-hot steel, billets, bars, castings, ingots, plates, rails, beams, and glass.
- Durable marks will not run, discolor, or char. Specially formulated paint shrinks at the same surface cooling rate so marks won't crack or peel.
- Capable of marking on surfaces ranging in temperature from 200°F – 2200°F. Available in two temperature ranges: HI and UHI
- Outlasts “hot chalk” for extending writing life.
- Fast-drying marks are long-lasting even during handling or when immersed in cold water baths.

Qty: 12 / box - 144 / case

railroad chalk

applications

- General Purpose
- Anywhere an economical temporary mark is needed

PRODUCT FEATURES

- ø1” tapered x 4” Long.
- Large tapered shaft is easy to hold.

The image features the lowercase letters 'in' cut out of a grey, textured surface. The letters are dark grey with a slight shadow, giving them a three-dimensional appearance. The background is a light grey with a fine, vertical, wood-grain-like texture. In the bottom right corner, there is a small, colorful, abstract shape that looks like a piece of paper or a small object.
